

**GENESAL
ENERGY**

INTERNATIONAL

**We give you energy,
wherever you are.**

At GENESAL ENERGY we adapt our skills to diverse environments that put our skills to the test. Our international experience allows us to tackle any energy related challenge.

**our generators for
o the test. Our
s to take on any**

We operate in more than 30 countries worldwide.

Europe

Our European **distribution network consists of strategic partnerships with businesses boasting qualified personnel**, who receive the support and means to meet the challenges and particularities of the different markets they operate in.

Latin America

Through our branches **we have very extensive coverage in the continent**, providing a wide range of products and services, focused on providing integrated energy solutions personalised to each client.

Africa

We can count on close collaboration and localised experts in our network assisting in the development of specialist projects **from power plants to the distribution of tailor-made gensets**, whilst working very closely with the final client throughout the entire process (this includes financing and logistical support).

Middle East

As part of development in this exciting region we have developed a strategic partnership in **Bahrain and Qatar focused on development in these markets**.

With a view to keeping operational costs down and to maximise project management, GENESAL ENERGY has opened strategic branches in Peru and Mexico: both specialising in the demands of their individual national markets.

PERU BRANCH

Our office in Peru is not only focused on the sale and distribution of generator sets, it also **offers the possibility to rent gensets for specific projects**. Additionally, the office is also characterised with an efficient After Sales Service operation and Technical Assistance.

MEXICO BRANCH

Situated in Mexico City, our Mexican branch is focused on special project design. The type of projects we are involved in require high level of engineering skills to ensure the end-product adapts perfectly to each given scenario. As with Peru an **After Sales Service is available, as well as training and assessment services**.
